project title:

Indian cross-examination hinges on contradictions (BSA s.148) and material omissions (BNSS s.181) between a witness's court testimony and earlier statements. Advocates find them by reading hundreds of pages by hand, and an omission can't be searched for. Case files are privileged, so cloud AI risks client confidentiality, and chatbots invent quotes. Lawyers need a tool that finds these conflicts, cites each to its exact page, and never lets files leave the laptop.

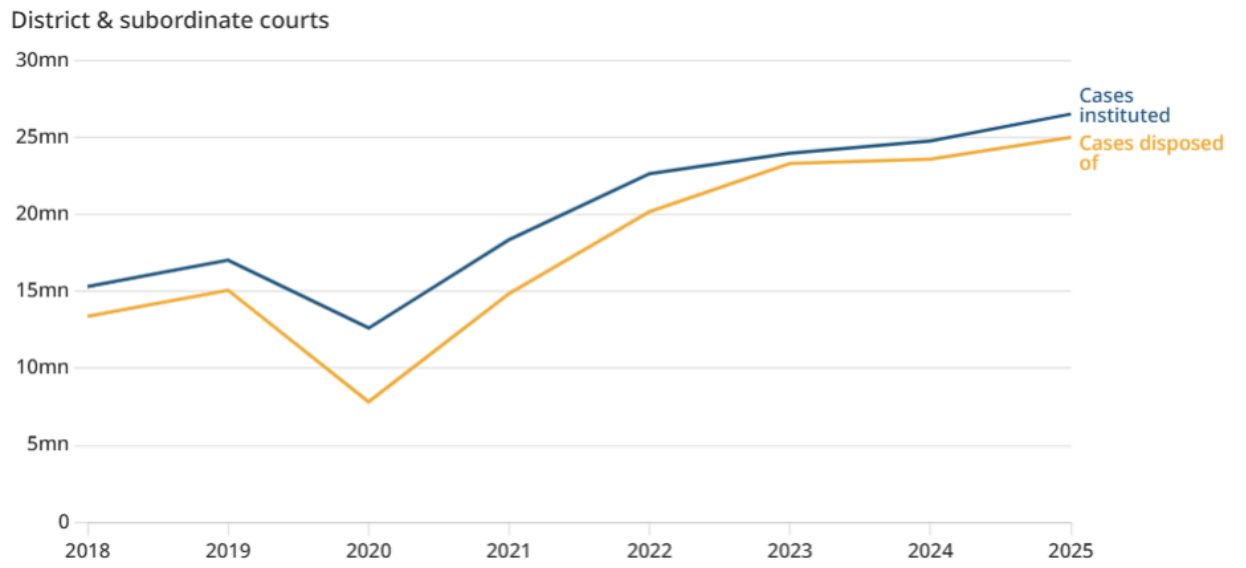

Data from

Judicial pendency in India

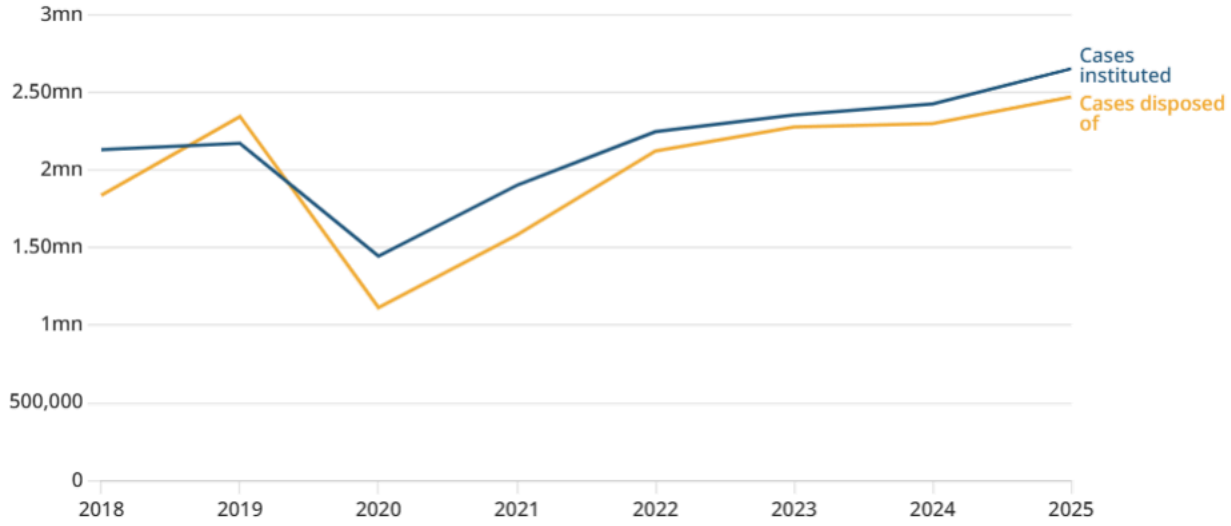

By Ameya Bokil

Reference:

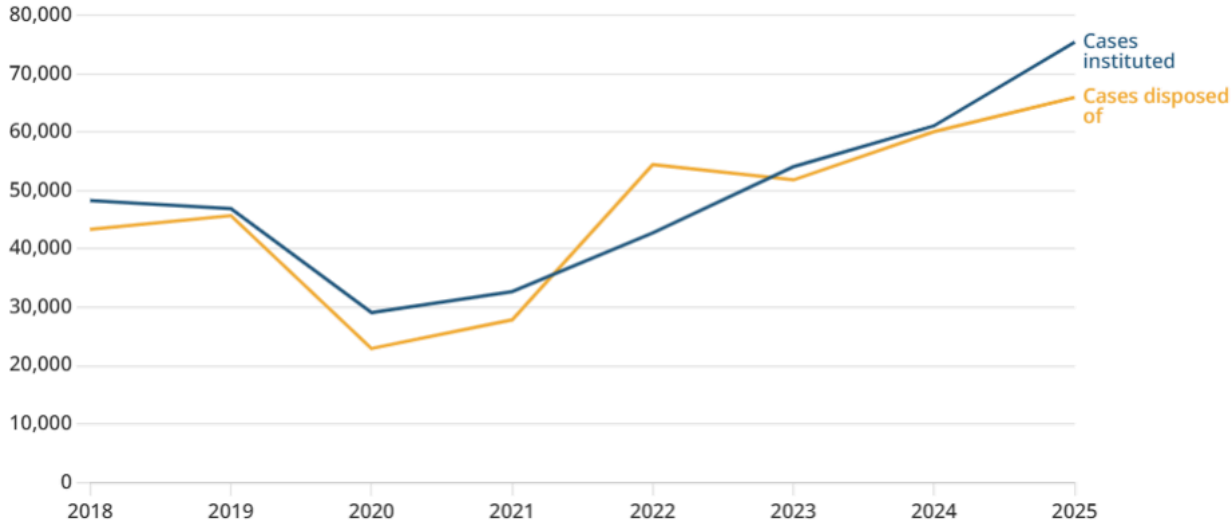

At the end of 2025, the Indian government reported that there were 54 million cases pending across the three levels of the Indian judiciary - district and subordinate courts, High Courts and the Supreme Court.

High Courts

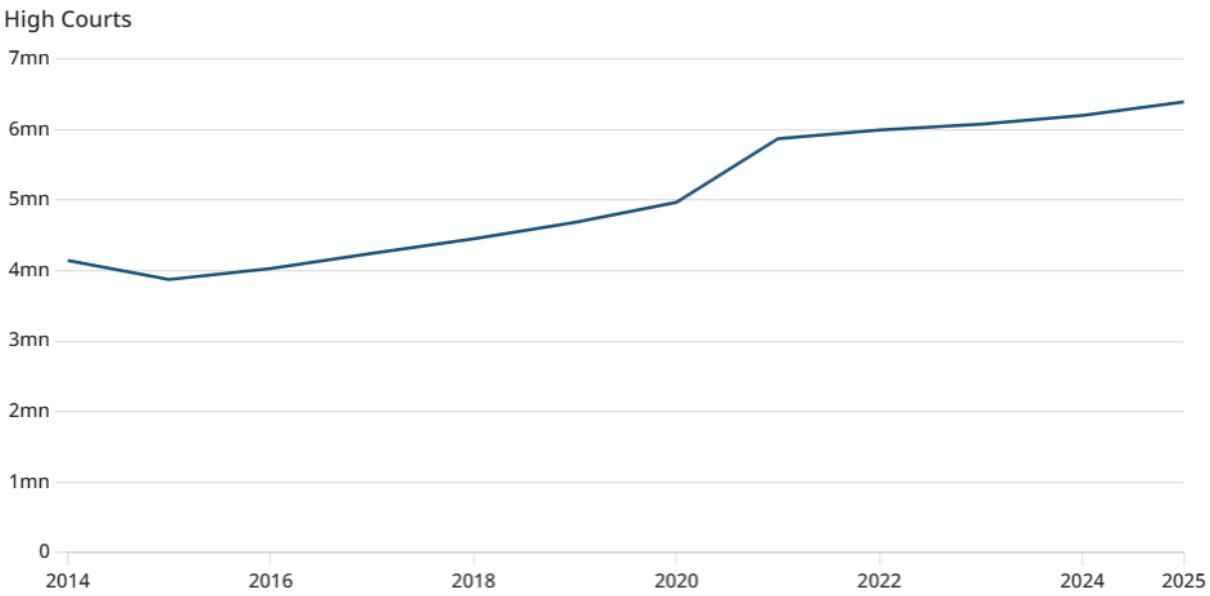

Supreme Court

Case pendency by court levels

The case pendency at all court levels has hit record highs almost every year

Select court level

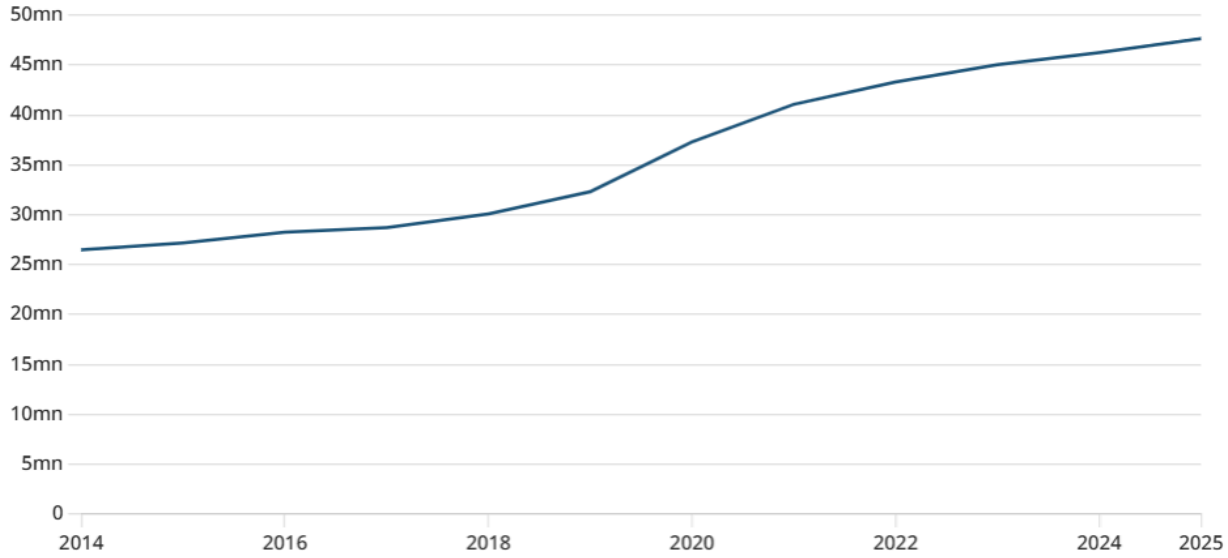

Case pendency by court levels

The case pendency at all court levels has hit record highs almost every year

Select court level

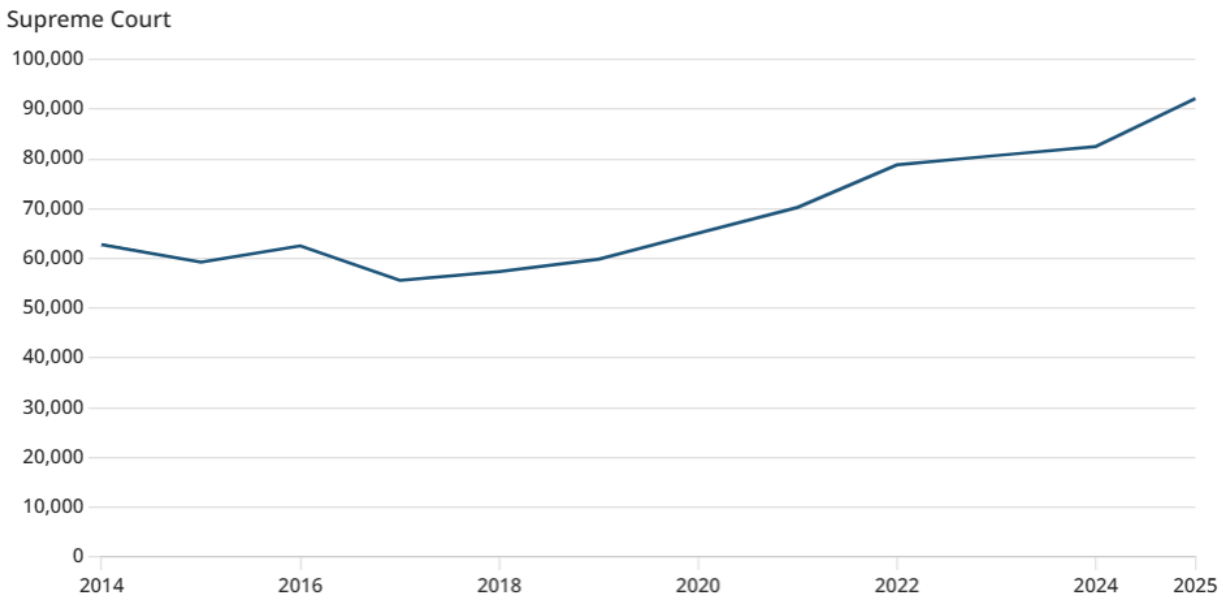

District & subordinate courts

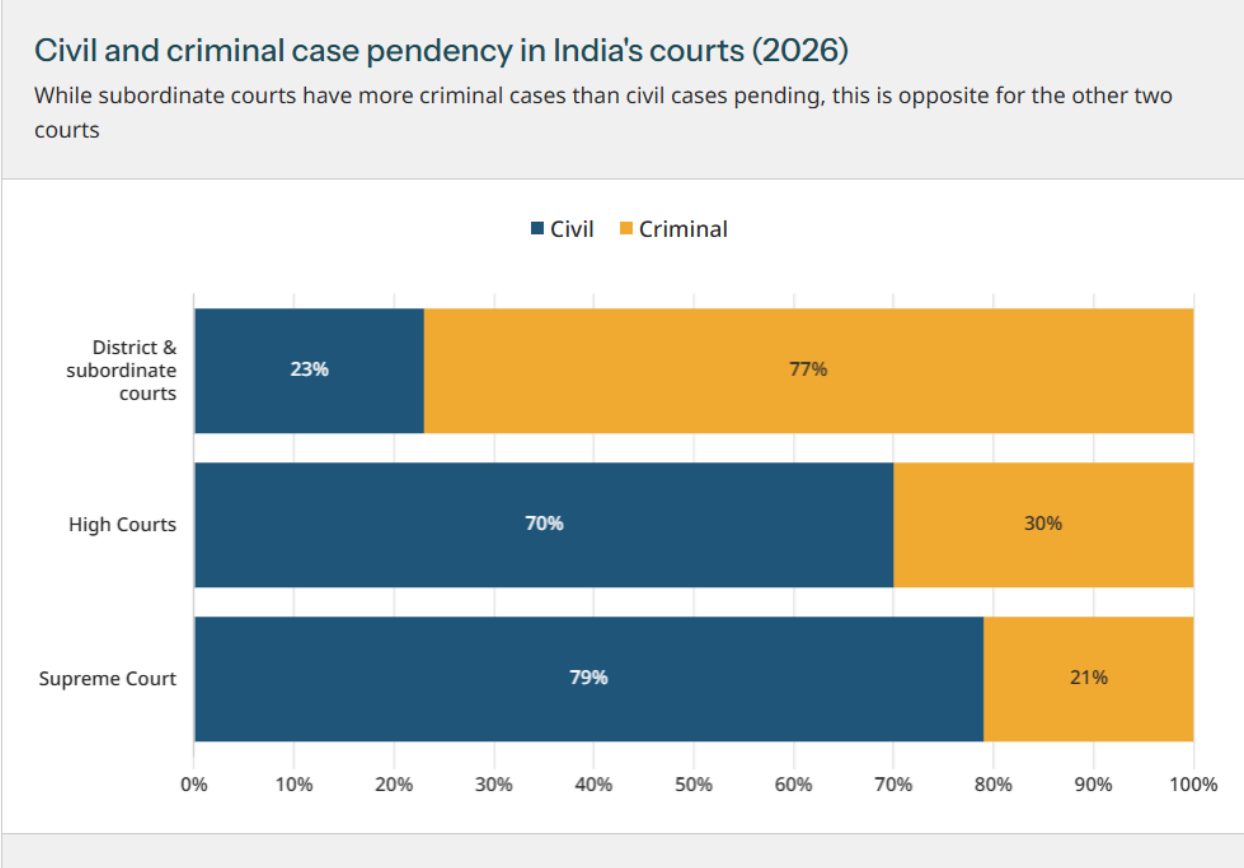

Case pendency by court levels

The case pendency at all court levels has hit record highs almost every year

Select court level

In the district and subordinate courts, nearly one in three cases have been pending for longer than five years, and one in ten for longer than ten years.

About ChargeSheets

In legal terms the tactic is called a document dump. The core facts constitute a minuscule portion of the chargesheet. The bulk of it is made up of whatever marginally related bullshit they could get their hands on.

It's primarily a bullying tactic meant to bury defendants in litigation costs, plus the huge amount of arbitrary evidence submitted lengthens the trial as the prosecution can use all sorts of tactics to beat around the bush while the undertrial spends day after day in jail. Just the preliminary hearings can take months.

This is also what courts do with their judgements, they are dangerously obfuscated and it's almost impossible to be deciphered by most people.

Their reason is that they need to make sure, reader only infer what they want to say, so there couldn't be any room for misinterpretation in future.

File Length: Varies from 10 pages for simple disputes to 100+ pages for standard cognizable offenses, and 500–1,000+ pages for complex cases.

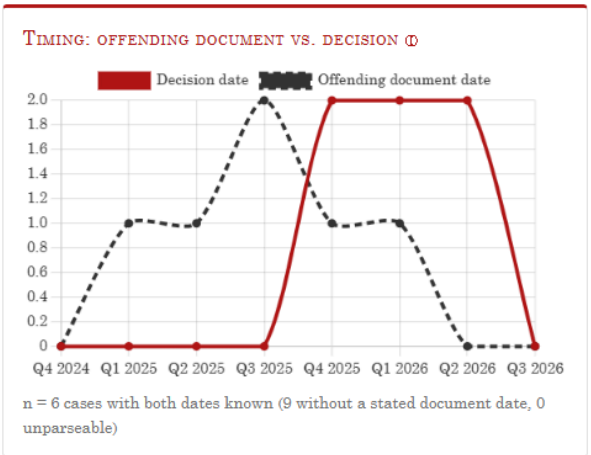

Manual Review Speed: Roughly **3 to 6 hours per 100 pages** for a junior lawyer or reviewer to read, cross-reference witness statements, and analyze evidence.
